

Scientific Workshop

Saturday 17th October, 2009

Dear Friends

We invite you to attend the Australasian Society of Thrombosis and Haemostasis' annual Scientific Workshop at the Hawke Centre, North Terrace, Adelaide on Saturday 17th October 2009.

The Workshop is conveniently scheduled to dovetail on to the end of the AIMS NSM (12-16 Oct) and the beginning of the HAA meeting (18-21 Oct) thus allowing delegates attending these conferences to extend their stay and take advantage of the stimulating Workshop program which will feature presentations on the latest developments in thrombosis and haemostasis. As in previous years, an international speaker from HAA has agreed to present at the workshop and on this occasion Prof Marco Cattaneo, from the University of Milan, Italy, will talk on 'Platelet Function Testing'. Other confirmed topics include HITS, identification of inhibitors and the measurement of uncertainty.

There will also be a poster display adjacent to the trade exhibition, with prizes being awarded to the best posters at the end of the Workshop. Young scientists in particular are encouraged to submit a poster for inclusion.

Registration details are available from www.asth.org.au

Who should attend?

Medical scientists, Laboratory scientists, Research scientists, Clinicians, Haematologists, Academics, honours students, haematology students

We look forward to seeing you in Adelaide for an exciting Workshop

Chris Ward
ASTH President

Grace Gilmore
Workshop Convenor
